athena@athenaconsulting.eu

The IEEE MetroArcheo 2024 Organizing Committee invites proposals for Special Sessions on new or emerging topics in metrology for Archaeology and Cultural Heritage that have the potential to have a major impact on the field in the near future.

The goal of these special sessions is to provide a forum for focused discussions on new topics or innovative applications of established approaches. A special session could address a particular theme or consist of work done in some particular international project.

SPECIAL SESSION PROPOSALS

Special Session **proposals** must contain the following information:

- Title of the proposed Special Session;
- Names, affiliations, and contact information of the session organizers;
- Brief biographies of the session organizers;
- Brief description of the proposed session with a list of the related topics.

Papers submitted to special sessions will undergo the same review process as regular papers, where the Special Session Organizers are responsible for organizing the peer-review process. If a Special Session has a low number of accepted papers, these may be combined with other special sessions wherever possible, or moved to the regular track. In case of indication of weakly organized special sessions, the Special Session Chairs will support the organizers with advices.

Special Session Proposals must be submitted through the submission website at

www.metroarcheo.com/special-sessions
